About GPL Art Gallery Hanging System

GPL is the manufacturer of wire suspension system. Our products are made under strict quality control for safety and Longevity. We manufactured & created a line of products precisely designed for end user. Our Art Gallery system gives a clean and discreet look, and are strong enough to hold weight up to 20 Kgs.

The Art Gallery system consists of just three basic components: Channel, Cable, and Grippers.

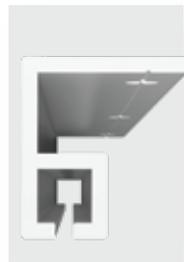

Channel: This is the main part of hanging system for wire hanging & sliding.

The Channels are available in 2 versions a wall-mounted & ceiling-mounted version. The Channel mounts included fastening clips, screw which are hidden behind the Channel and provide a clean and modern feel.

Cable: After selecting the Channel, the next step is to choose the hanging option, which can be Cable.

The cables are available in transparent nylon or Galvanized steel and are extremely popular because they are strong yet subtle. The ball-end cable slides in and out of the rail making it very secure and safe. The Cable can be inserted and removed from the rail at any point making it extremely flexible and easy to use.

Gripper: Advanced GPL Grippers are manufactured with special grade material.

This Gripper mechanism is a fast and easy adjuster, where to suspend pictures or photo frames vertically or at slight angles. To complete the hanging system the last step is to choose a Gripper. The Gripper can be positioned at any height along with the hanger and then attaches to the artwork. GPL has designed the grippers for cables that comes in different sizes and shapes. GPL Grippers are self-gripping styles due to their ball bearing mechanism. All of GPL Grippers are designed with safety, security.

Product Specification

Channel- for Ceiling

Description

Item -01 (GPA-162)
 Material : Aluminium
 Weight : 531gm/pcs
 Colour : White Powder Coating

Channel- for Wall

Description

Item -05 (GPA-167)
 Material : Aluminium
 Colour : White Zinc

GPCB-387

GPCB-455AL

GPCB-475

GPCB-476

Gripper- for Gripping

Description

Item -GPCB/387/455AL/475)
 Material : Brass/Aluminium
 Colour : Silver/Nickel

The Casted ball is made of special grade Zamak material

WIRE WITH END CAST

Description

Item -05 (GPA-164)
 Material : MS
 Colour : White Zinc
 QTY .01 NOS.

Special engineering grade polymer with tapered end for channel end covering.

CHANNEL COVER

Description

Item -02 (GPA-163)
 Material : Nylon
 Colour : White
 QTY .2 NOS.

High quality polymer plug. Use for screw holding in wall or ceiling.

WALL PLUG

Description

Item -03 (GPA-166)
 Material : PVC
 Colour : Off White
 QTY .3 NOS.

Special grade steel screw, to mount the channel on wall or ceiling.

SCREW

Description

Item -04 (GPA-165)
 Material : MS
 Colour : White Zinc
 QTY .03 NOS.

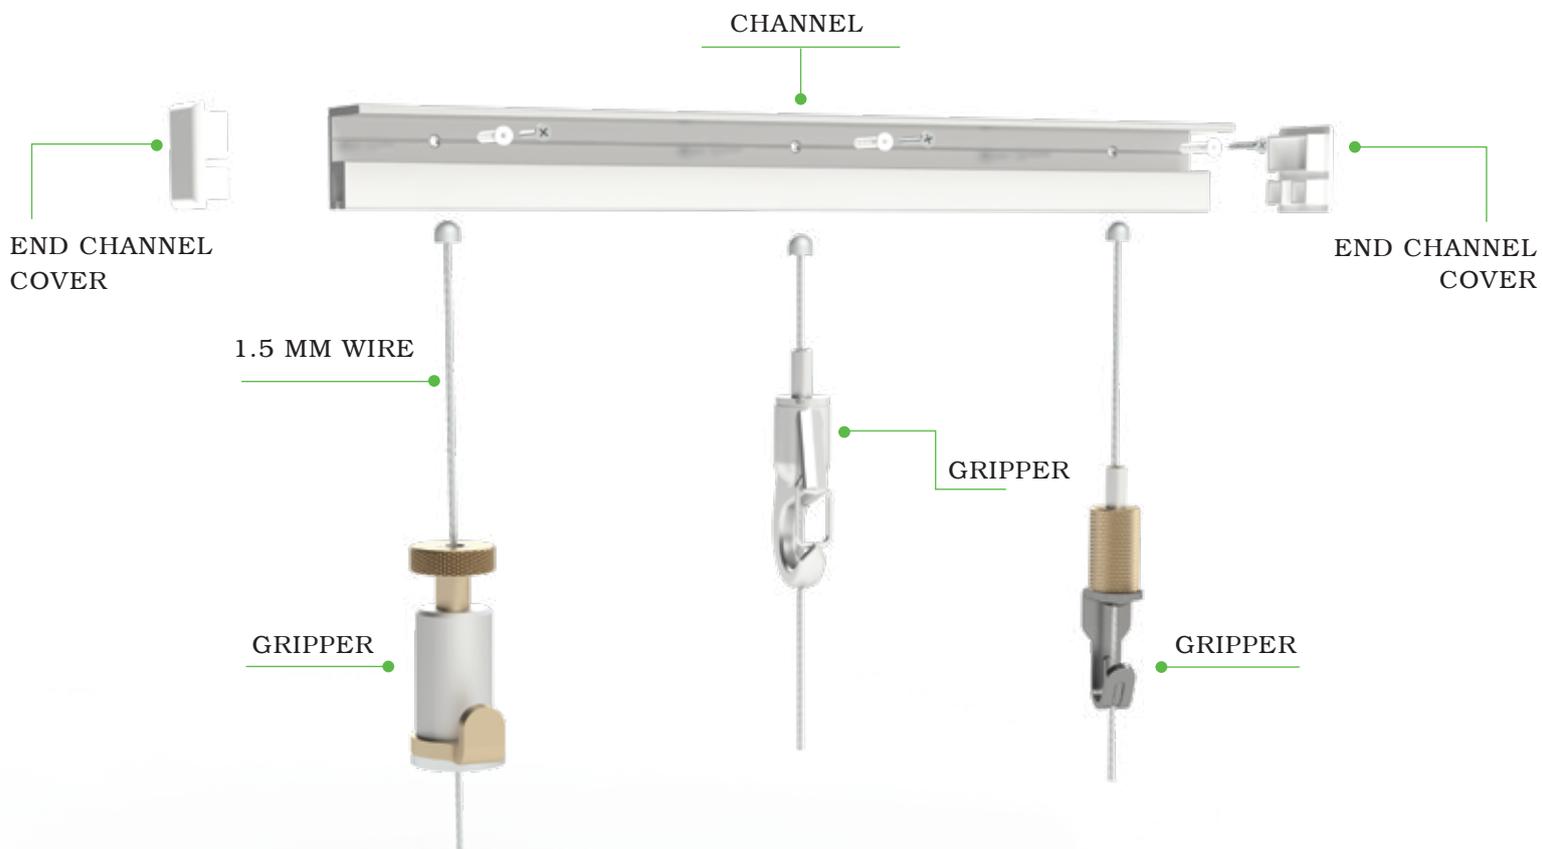

Special Feature & Instructions

Features

- Single chanel design, for suspensions from ceiling or the wall.
- Load bearing capacity of our Adjusting Mechanism is up to 100 KG. Recommended Safe working load is 20 kg.
- Steel wire ropes 1.5 mm, duly galvanized can take load to 100 KG.
- Easily to adjust & secure application for picture hanging system.
- Provides clean & modern look/feel.

Assembly Instructions

- 1) Drill in to wall or ceiling according to drawing specifications.
- 2) Mount the channel on wall or ceiling by using screw and plug.
- 3) Insert the casted wire end into the channel and another wire end into picture hook gripper.
- 4) Hang the pictures or photo on hook.
- 5) If need to re-adjust the picture hook gripper placement adjust the wire by pushing the plunger.
